

What do we propose, where, and why?

Offer safety and security measures to:

- Correct school safety and building access issues
- Add sprinklers and fire suppression; correct upper gym floor structural issue; and provide vehicle access around the main building.

Address educational programming needs to:

- Bring existing instructional spaces into compliance with state standards and requirements

Renovate each and every classroom and hallway to:

- Remove dated finishes and address problem items
- Provide updated HVAC and new utilities
- Provide new and more efficient lighting
- Install communications and data systems

Build a new library in the current office space with expansion into the current Courtyard to:

- Provide adequate library facilities
- Provide limited access for better asset and personnel security

Convert the existing library to office space to:

- provide a secure main visitor entrance at the true front of the school
- Provide better facilities for Television Productions class, CTV 6, Audio/Visual resources, and Channels 17 & 23

Create a new science wing in the area of the current upper gym to:

- Provide safe science labs that meet standards
- Correct deficiencies with mechanical, electrical, and plumbing systems in the labs
- Address structural problems in the upper gym

Convert the Davis Gym to performing arts space to:

- Increase band space to state standards, provide facility for band rehearsals, provide adequate active storage
- Move chorus from storage room and provide adequate facility

Expand and renovate the Seifert Auditorium using vacated band space for needed active storage, prep, and costume changing to:

- Create better performance venue for students and the community
- Help regulate access points
